SUMMARY

Detail-oriented Data Scientist with a strong foundation in Data Science and experience designing robust, data-driven systems. Skilled in Python, SQL, and AWS, with a focus on building real-time pipelines and automating complex data workflows. Eager to architect scalable solutions and contribute to impactful data science projects in fast-paced environments.

SKILLS

- **Languages:** Python, SQL, PySpark, Scala
- **Tools | Technical Skills:** Machine Learning, Data Mining, Power BI, Data Pipelines, ETL/ELT Development, Data Warehouse
- **Frameworks | Libraries:** Scikit-learn, Hadoop, NumPy, Pandas, Seaborn, TensorFlow
- **Soft Skills:** Analytical thinking and problem solving, Communication and collaboration, Technical Curiosity and Inquisitiveness, Agile, Scrum

PROJECTS

AI-BASED AGE & GENDER DETECTION SYSTEM

- Implemented an end-to-end dual-model system combining LSTM (for voice age prediction with ± 2.8 years MAE) and CNN (for fingerprint gender classification with 93% accuracy)
- Engineered robust preprocessing: 64 'MFCC feature extraction (Librosa) for voice, and ridge pattern enhancement (OpenCV) for fingerprints
- Designed a Bidirectional LSTM (128 '64 units) for temporal voice analysis, and a CNN architecture (Conv2D 'MaxPooling 'Dense) for spatial fingerprint features
- Optimized model performance with dropout regularization ($p = 0.5$) and the Adam optimizer ($lr = 0.001$), achieving a 30% improvement in generalization
- **Key Technologies** | Exploratory Data Analysis, Data modelling, Keras, Hyperparameter Tuning, Machine Learning

AUTOMATIC NUMBER PLATE RECOGNITION SYSTEM

- Built and deployed a real-time number plate recognition system using YOLO, achieving 95% accuracy
- Engineered a customized YOLO architecture that boosted vehicle plate detection speed and recall rates by 20% over baseline models.
- Deployed and tested the system via GitHub and Postman, ensuring robust API integration and scalability
- Achieved 90% recall rate and exceeded baseline performance metrics
- **Key Technologies** | OpenCV, MongoDB, Computer Vision, GitHub

T20 WORLD CUP PLAYER ANALYSIS

- Utilized web scraping tools to gather T20 World Cup player performance data
- Cleaned and processed data for accuracy and consistency
- Employed statistical analysis and visualization tools to compare player metrics (Boundary % > 50, Strike Rate > 125, Bowling Economy < 7)
- Built interactive dashboards in Power BI to visualize player performance and team insights
- Identified top batsmen and bowlers, Built an optimized dream team with a 92% win probability.
- **Key Technologies** | Scrapy, MS Excel, Data cleaning, Data Manipulation, Data Analysis, Data Visualization

CERTIFICATIONS

- Coursera Introduction to Data Analysis using Microsoft Excel | Sep 2023
- RapidMiner Altair Data Science Master Certification | Sep 2024
- AWS Academy Graduate - AWS Academy Machine Learning Foundations | Dec 2024
- Forage Deloitte Data Analytics | Sep 2025

EDUCATION

CVR COLLEGE OF ENGINEERING

Nov 2021 - Jun 2025

B.Tech, Computer Science Engineering (Data Science)

- **GPA:** 7.4

ST. JOSEPH'S PUBLIC SCHOOL

Jun 2019 - Aug 2021

Intermediate, Mathematics, Physics, Chemistry, and Computers

- **GPA:** 7.6

EXTRACURRICULAR

Hackathons

- Participated in multiple hackathons, notably the Smart India Hackathon(SIH)

Sports

- Captained the college basketball team and competed at the regional level, developing leadership, strategic planning, and collaborative skills in a competitive environment.
