EDUCATION

CVR COLLEGE OF ENGINEERING | B.TECH IN
COMPUTER SCIENCE ENGINEERING (DATA SCIENCE)
Hyderabad | Expected Graduation: 2025

ST. JOSEPH'S PUBLIC SCHOOL | INTERMEDIATE -
MATHEMATICS, PHYSICS, CHEMISTRY, AND COMPUTER
SCIENCE
Hyderabad | June 2019 – August 2021

SKILLS

Technical Skills

- **Programming Languages:** Java, Python
- **Big Data Tools:** Hadoop, Hive, Pig
- **Data Visualization:** Power BI, Google Sheets
- **Databases:** MySQL, Database Management Systems
- **DevOps:** Agile, Scrum
- **Python Libraries:** Pandas, NumPy, Matplotlib, Scrapy

Soft Skills

- Decision Making & Problem-Solving
- Attention to Detail & Communication
- Technical Curiosity & Inquisitiveness

PROJECTS

AI-BASED AGE & GENDER DETECTION SYSTEM | (DEEP LEARNING · BIOMETRIC ANALYSIS)

- Developed an end-to-end dual-model system combining **LSTM** (voice age prediction with ± 2.8 years MAE) and **CNN** (fingerprint gender classification at 93% accuracy)
- Engineered robust preprocessing: **64->MFCC feature extraction** (Librosa) for voice and **ridge pattern enhancement** (OpenCV) for fingerprints
- Designed **Bidirectional LSTM** (128->64 units) for temporal voice analysis and **CNN architecture** (Conv2D->MaxPooling->Dense) for spatial fingerprint features
- Optimized model performance with **dropout regularization** ($p=0.5$) and **Adam optimizer** ($lr=0.001$), achieving 30% better generalization
- **Key Technologies:** Python, Keras, Digital Signal Processing, Computer Vision, Hyperparameter Tuning

AUTOMATIC NUMBER PLATE RECOGNITION SYSTEM | (PYTHON, YOLO, MONGODB, NODE.JS, GITHUB, POSTMAN)

- Developed a real-time number plate recognition

system for security and traffic monitoring using video feeds

- Leveraged YOLO's object detection to achieve high-speed plate recognition with 95% accuracy
- Customized YOLO architecture to optimize detection of vehicle plates, enhancing speed and recall rates by 20%
- Deployed and tested the system via GitHub and Postman, ensuring robust API integration and scalability
- Achieved 90% recall rate and exceeded baseline performance metrics

T20 WORLD CUP PLAYER ANALYSIS | (PYTHON, POWER BI, PANDAS)

- Utilized web scraping tools to gather T20 World Cup player performance data
- Cleaned and processed data for accuracy and consistency
- Employed statistical analysis and visualization tools to compare player metrics (Boundary % > 50, Strike Rate > 125, Bowling Economy < 7)
- Identified top batsmen and bowlers, forming an optimized dream team with 92% winning chance

CERTIFICATIONS

- Salesforce Developer Certification
September - December 2023
- Coursera: Introduction to Data Analysis using Microsoft Excel
Completed 09/2023
- RapidMiner: Altair Data Science Master Certification
Completed 09/2024
- AWS Academy Graduate - AWS Academy Machine Learning Foundations
Completed 12/2024

CO-CURRICULAR ACTIVITIES

Hackathons

- Participated in multiple hackathons, notably the Smart India Hackathon (SIH)
- Collaborated with diverse teams to address real-world problems

Sports

- Regional-level basketball player, represented school, showcasing leadership and teamwork
- Leading the college team, reinforcing commitment to sports
